WHY A WORKCAMP?

Our workcamps are a non formal learning proposals for young people coming from many different countries and cultures. **Workcamp projects are a living way to share culture, supporting non profit world and developing local communities traditions, promoting ideals of solidarity and citizenship.**

The aim of the activities, besides the realization of the projects, is to contribute to the **creation of a multicultural society based on discussion between different people.** Our aim to work at local and global levels.

We believe that the presence in international camps of volunteers, coming from various countries and social backgrounds, brings us closer to this goal; thus, allowing local or isolated communities to get in touch with different cultures, and to learn and communicate with them.

We want to promote solidarity in a constructive way, not free assistance: **practical help can be useful to overcome emergencies**, but we prefer to provide tools and methods that can be used in order to build the Future...

And it is only with the help of our volunteers that we have been able to achieve what we have, no matter how much time and energy they dedicated to the global project of the organization. Thanks to our wonderful volunteers!!!

Our proposal to you as a future volunteer is to take part in a project that will cover:

- Full-learning experience of voluntary service for local communities, in an intercultural framework, while supporting your independence
- Leisure activities to enjoy your free time, being in contact with local community and share their culture
- Accommodation and food during the workcamp period

Expectations... in action!

We really expect your motivation and dedication to take part in the project... So when you come, come be prepared to:

- Contribute with energy and action, to the daily life of the camp as a group member
- Work about 30 hours per week
- Respect and enjoy cultural and social diversity of participants and locals

- education activities (education projects at schools and at extra-schools basis through a non-formal education method focused on active citizenship, European conscience, fight against racism and xenophobia, human rights principles);
- Cultural events (conferences, seminars, workshops, cineforum, concerts, art exhibitions);
- Intercultural activities (programs and projects of youth mobility, education on international topics, promotion of different cultures in Italy and abroad, welcome activities for tourists and foreigners, promotion of Youth in Action Program);
- Territorial promotion (promotion of its typical aspects that regard artists, culture, heritage, enogastronomy, tourism, sport activities)
- The educational activities consists of providing non-formal education opportunities for young people while involving as many as possible, and trying to include others that have never participated before. Our aim is to help youngsters develop their competences (life skills) by using non-formal learning tools. We try to educate youngsters on a peaceful cohabitation with people coming from different cultures, countries and social conditions by giving them the opportunity to confront themselves with others in an intercultural environment which stimulates the development of a social conscience.

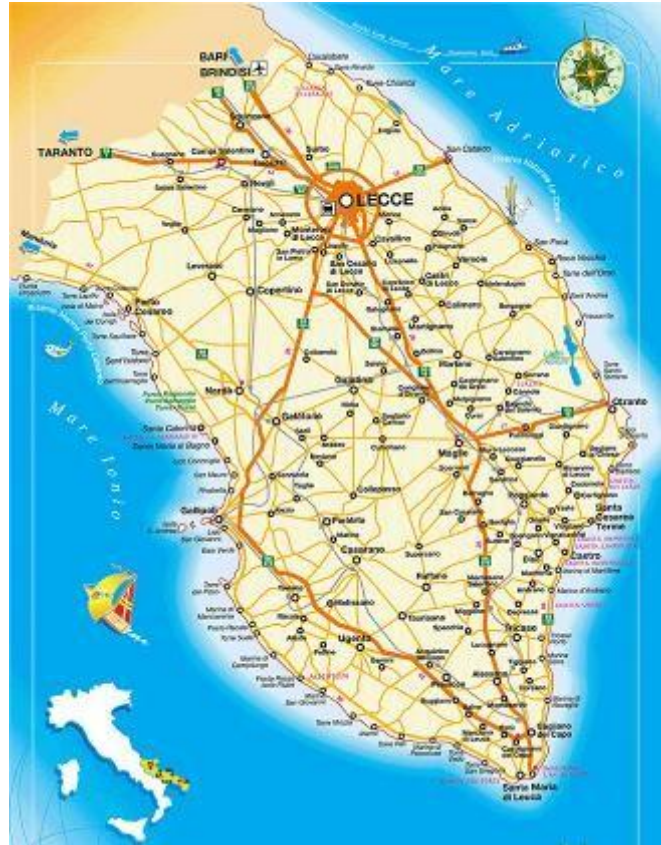

INFORMATION ABOUT THE AREA

SALENTO REGION

Salento (*Salentu* in the local dialect) is the south-eastern extremity of the Apulia region of Italy. It is a sub-peninsula of the main Italian Peninsula, sometimes described as the "heel" of the Italian "boot". "Salento: the sun, the sea, the wind" so goes the local saying is a perfect synthesis of this land.

Salento, a **peaceful land full of history and traditions**, boasts with nature's & architectural beauty, hospitality, atmosphere, and of course a immaculate sea and its coastline.

There are no mountains and your eyes would sweep over far horizons running into the ancient architectures of the stone here and there, spotting pajares, menhirs.... A landscape where the nature has been tough and where only the climate and the stubbornness of the man has made it possible to produce the excellent DOC products for centuries.
